Alberta College of Pharmacists

Healthy Albertans through excellence in pharmacy practice
Alberta College of Pharmacists

- **ACP’s vision**: Healthy Albertans through excellence in pharmacy practice
- **ACP’s mission**: The Alberta College of Pharmacists governs pharmacists, pharmacy technicians, and pharmacies in Alberta to support and protect the public’s health and well-being. We take responsibility for pharmacy practice by setting and enforcing high standards of competence and ethical conduct.
**Pharmacy interns can apply for the CLINICAL PHARMACIST register once they have successfully completed all of the above.**

### Pre-requisites for PHARMACIST registration (can be completed in any order):

Prescribers

Instructions: Click on each image to learn more about each prescribing authority

- Following sections provide snapshot of prescribing authorities for different health professionals in Alberta
- Only a snapshot and information provided may have changed
Determining the schedule of a drug

Instructions: Drag and drop the following drugs into the appropriate box.

- Refer to Alberta exemptions list, NAPRA website, or Health Canada’s Drug Product Database.

Note: for Jurisprudence exam, you will need to identify Schedule of drug without references.

Drug: Otrivin® (xylometazoline) pediatric nasal spray 0.5%

Schedules:

Schedule 1
Schedule 2
Schedule 3
Un-Scheduled

Drugs remaining: 24
Chat

Instructions: Click on each speech bubble to reveal the 3 prime questions

What did your prescriber tell you your medication is for?

Purpose

- Asking this question can help a pharmacist verify the purpose for the medication

How did your prescriber tell you to take the medication?

Direction

- Asking this question can help a pharmacist reveal the patient's understanding of how he/she is to take the medication

What did your prescriber tell you to expect?

Monitoring

- Asking this question can help a pharmacist determine the patient’s expectations from his/her medication

Continue
Facilities and equipment

According to Standards for the Operation of Licensed Pharmacies, the dispensary must be equipped with certain items.

Instructions: Click on each number in the dispensary to identify the required items.
Maintaining and securing privacy

- *Health Information Act* sets out criteria and standards for custodians to protect health information

Submit a Privacy Impact Assessment for proposed new systems, policies, or practices affecting health information management

Locks remaining to click: 4
Documentation

Instructions: Drag and drop each file folder to the computer to reveal examples of activities that need to be documented.

Rating and feedback

Module rating

Excellent 44.9%
Good 9.8%
Very Good 44%
Fair 1.2%
It was one of the best modules I have come across

Really helped with the studying process

Helped to simplify the acts and made it easier to understand

Interactive component VERY useful

Actually made the drug schedules/acts and regulations interesting!!!!

Covered all relevant information

Small quizzes with explanations very helpful
Questions
