

Biologist

Registration Process

Biologist

Registration Process

Description of Occupation

Biologists research and learn about living organisms and ecosystems, manage natural resources and develop new practices and products in diverse fields. Their activities can include taking inventory of organisms (such as plants, animal or communities), organizing and conducting field studies to monitor biological systems (such as population dynamics, genetics or habitat), analyzing and interpreting data, writing scientific papers and reports and using statistics and mathematical models to estimate the number and kinds of organisms in a specific place. Biologists can work in many different specialties and they can work in offices, laboratories or in locations such as boats or in remote areas.

Obtaining Registration in Alberta

To practice in Alberta, biologists may voluntarily register with the Alberta Society of Professional Biologists (ASPB). To use the professional designation of Professional Biologist (P.Biol.), biologists must be registered with the ASPB. Registration may also provide improved employment opportunities and in some cases, may be a requirement to secure employment.

Internationally educated Biologists can begin the application process before they arrive in Alberta. You can apply online with the ASPB to become a Professional Biologist or a Biologist-in-Training. Apply online and provide detailed and accurate answers to all questions. When your application is complete send your documents to the ASPB.

Contact information and other resources are at the end of this document.

Requirements

Internationally educated Biologists must meet the following requirements:

1. Academic Credentials

To become a Professional Biologist in Alberta, you must have completed at minimum an undergraduate degree in the biological sciences or equivalent. The ASPB Registration Committee considers a university degree equivalent to a biology degree if it includes twenty-five (25) science courses, of which fifteen (15) are in the biological sciences, and where four (4) or more of the biological science courses are at a senior level (e.g., 300 or 400 level).

In order to have your academic credentials assessed, you must apply to the International Qualifications Assessment Service (IQAS) for a Specialized Assessment. For details on how to obtain an IQAS assessment, current processing times and to download an application, visit the IQAS website at the address provided at the end of this document.

Then, submit the following to ASPB:

- Results from your IQAS assessment

2. **Work Experience**

To become registered with the ASPB you must have three (3) years of practice in biology after the completion of an undergraduate degree in the biological sciences or equivalent. This experience must be within ten (10) years of your application date. If you have a Masters or doctorate degree in biology from a recognized program, you may be given one (1) year of biology practice credit depending on where you received your degree.

- Complete the application form available online and list the dates, location of experience and details of your role as a biologist.
- You must include sufficient work experience references to support your work experience claims.

Note:

- Work experience can be international.
- If you hold an undergraduate and/or graduate degree in biological sciences or equivalent, but do not have the practical experience, you may apply to become a Biologist-in-Training (BIT). Once you have the equivalent of three (3) years of practice that is equivalent to the type of work a Professional Biologist does, you will be able to become a Professional Biologist with the ASPB.

3. **Good Character and Reputation**

A biologist registered with the ASPB must be of good character and reputation.

Provide the names of three (3) references that are knowledgeable about your professional experience as a biologist and can speak to your character and reputation. At least one (1) of these references should be a Professional Biologist. If a Professional Biologist is not available, a professional from another recognized professional organization will be accepted by the ASPB.

Preferred references include the applicant's current employer, previous employer or supervisor. Only two (2) letters of reference will be accepted from a current employer.

Payment

The following fees must be submitted during the registration process. Fees are in Canadian dollars.

ASPB Professional Biologist Annual Membership Fee	\$325
ASPB Biologist-in-Training Annual Membership Fee	\$75
*Fees are subject to change. See association for most up-to-date fees.	

Average Earnings

The overall average earnings for all Biologists, according to the Alberta 2013 Wage and Salary survey:

Average hours worked per week	38.9
Average wage per hour	\$40.98
Average salary per year	\$82,460

Employment Options

You can also consider working in Alberta in related occupations such as Biological Technician, Food Technologist, Hazardous Waste Management Technologist, Hydrometric Technician/Technologist, Medical Laboratory Technologist, Pollution Control Technologist and Water and Wastewater Operator.
